ERM
Indiana Public Retirement System
INPRS

(Employer Reporting and Maintenance)
GO Live October 1

Program changes developed to meet the new requirements of ERM began last fall with the anticipation of an April 1, 2012 go-live date. The delay to not go-live until October 1 has actually allowed for more development and testing time.
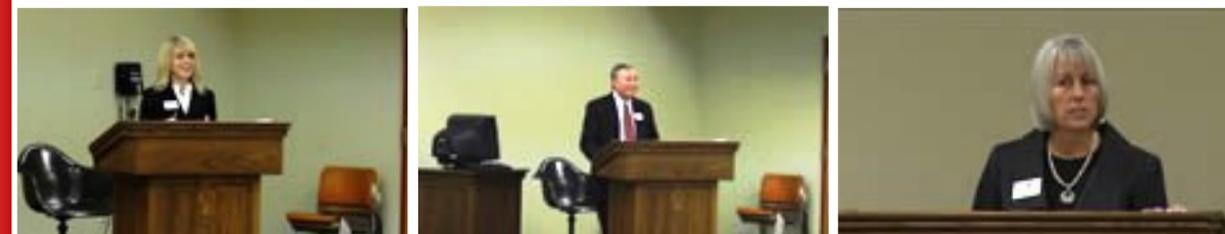

INPRS (Indiana Public Retirement System) announced their soft open period in the recent June 18 email. The site will be open for testing from July 16 through September 23. By now the initial user of ERM should have received an email with temporary password. This designated user will be able to log in and set up additional users if necessary. The URL link to access ERM should also have been emailed by INPRS on July 13.

Komputrol has released the Payroll update in time for you to upload a test file to ERM and complete the "practice points" outlined in the June 18 email from INPRS. As always, the Komputrol helpdesk will be available during our regular hours if you have questions on the Payroll changes.

HEALTH COVERAGE REPORTING ON W2S

"Health Coverage Reporting" for W2s 2013: As of this printing all employers are to start reporting health care coverage on W2s tax year 2013 and any employer with 250 or more employees are to report on tax year 2012. Komputrol software is ready to incorporate the reporting amount on the W2. Your insurance provider should be able to give you the amount for each of your covered employees.

HIGH PERFORMANCE INFORMATION SOLUTIONS

Annual User Meetings Slated for November

Thursday, November 8 – at Primo Center in Plainfield, Indiana

Tuesday, November 13 – at Boyce Systems in Daleville, Indiana

Thursday, November 15- at Honeywell Center in Wabash, Indiana

Annual School Corporation User Meetings are right around the corner. Above are the dates to put on your calendar. This year we will offer the regular two meetings; one at Primo and one at Honeywell. Additionally, there is a third meeting with VERY limited seating at Boyce Systems. This session is designated for taping this year's webinars and will be open to only 55 on a first come basis.

Continental breakfast and full lunch at midday will again be served. Breakout sessions will cover topics enhancements, as well as year-end procedures. Please let us know in advance if you have particular questions or procedures you are interested in, and we will do our best to address them in the appropriate session.

Look for online registration email in September. If you do not have internet access, we will be glad to assist on the phone. As always the annual user meetings are free to Komputrol maintenance customers; however, travel and lodging are on your own. We look forward to seeing you there.

Online reviewing was well received at year-end 2011. A couple units had difficulty streaming because of internet connection speed. We had to reduce the resolution to accommodate as many viewers as possible, so if the view seemed a little grainy, we apologize, but the content and information hold true.

Boyce Systems—A Company Attitude of Service

Customer Service is number one at Boyce Systems, but along with that comes service to each other and to community. Boyce just completed the sixth annual onsite blood drive in memory of Kim Dent, a former Komputrol employee who passed away from complications of a multi-organ transplant attempt. In her honor Boyce employees line up to donate knowing that there is someone out there still in desperate need. Boyce is also proud to have raised over $24,000.00 from company and staff this year for United Way.

FOR SCHOOL & COUNTY INFORMATION STREAMS

In the Loop with the Komputrol CEO

Michael B. Galliher, CEO
Boyce Systems

Hello All,

There are exciting times at Boyce Systems. Four new talented folks have joined our staff and they are already contributing in a very positive way. We hope to add a few more staff members in the coming months.

Keystone's latest City/Town Budget program, Key-Fund, is out and installed at a number of our customer sites. with many more in the queue for training. The new "Real Time" feature and flow of Key-Fund is producing positive comments and customers are suggesting great features to add to an already great product. The new platform allows future possibilities that will grow each year.

We have added a new partnership with **Atlas Collections**. Many years of trust and friendship precipitated the partnership. The folks that run **Atlas Collections** understand both State and Federal laws governing debt collection by a governmental unit. In all cases but fire department run fees, they can work with your unit at NO COST TO YOU. Fewer write-offs and more revenue could help in these critical budget times. We see the biggest need in utilities, city/town miscellaneous fees, courts and school fees. If you have interest please give us a call, send an email or get with your sales representative.

Invoice Cloud www.invoicecloud.com is another new partner. This feature rich web based electronic invoice presentment and payment application is at the forefront of the green initiative. Use of paperless invoicing and payments saves time, energy and paper waste. **Invoice Cloud** is a highly respected company, complying with all laws and regulations governing online payments. They are currently processing the largest tax collection county in the State of Indiana. **Invoice Cloud** will work with our utility billing systems to upload bills, adjustments and in-office payments, and download online payments back into billing. Setting up a demo of their product is easy. Please feel free to contact us.

It was great to see many of you at IASBO or ILMCT this year. I also wish to thank all of you for your continued trust in Boyce Systems and our suite of products.
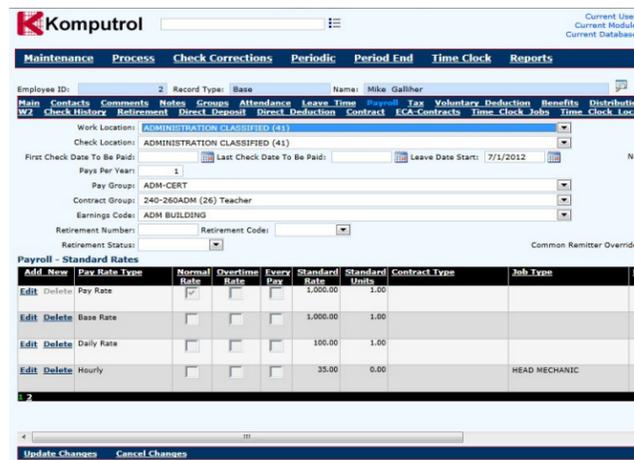

Mike

Web-Based Financial Package Update

Komputrol's web-based school financial system is in the Beta testing phase of development. The program is installed at two Beta sites currently and will go to a third this summer.

It has been determined that a pricing schedule and time line will be available at this year's annual user meetings as well as a quick overview of the product.

Many of the optional features our customers are now requesting have been added to this comprehensive package for expanded productivity; AP Voucher (APV), Accounts Payable Electronic Payment (APEP), and Direct Deposit, to name a few.

The New Look of Komputrol Financials

Boyce Adds Product Development and Support Staff

Patrick Abel joins the Komputrol Development team as a C# web developer concentrating on the new Komputrol School Financial Suite. As a former Keystone employee, Pat is familiar with the needs of our customers and the ideology of excellence and service Boyce/Keystone/Komputrol maintains.

In addition to his college work at Ivy Tech, he has work experience from Cardinal Health Systems Inc, and others. "I really appreciate the opportunity to be part of Boyce Systems and intend to do whatever is required to advance our software systems," he commented. Pat is a long time resident of Yorktown where he lives with his wife, Dee.

Cindy Jefferson, a recent addition to Customer Support, will be specializing in the soon to be released Komputrol School Financial Suite.

Cindy's education was centered in Business Management. A valued employee of Sallie Mae for 24 years, she will now apply her experience in training, supervising and auditing to meeting the development goals at Komputrol.

She and her husband of 37 years, DeWayne, reside in Daleville where garden flowers and hummingbirds erase the computer screen visions of the day. She did mention that the Boyce employees have been very friendly even though she is a New England Patriots fan.

Brian Webb comes to Boyce with a BA in Christian Ministries. He also has over 12 years of finance experience, including 7 years with Sallie Mae. Customer Support for Komputrol will begin his tenure with Boyce. He and his wife Beth Ann reside in Anderson where he enjoys "tech stuff" and sports. Brian is also a musician and spends free time playing, listening and participating in church activities. Brian has a 10 year old son, Ben and a new baby coming this fall.

Kristen Randolph recently graduated from Indiana Wesleyan University with a Bachelor's in Business Management and a certificate in Human Services. Concentrating in the area of Keystone Customer Support and Installation, Kristen comes to us with 2 ½ years of management experience.

She has 3 boys Kyle, Kaden and Braylon and lives in Daleville with her husband. Having three boys, her free time is consumed with sports; softball, camping, boating. Did I mention sports?

Mike Galliher, President and CEO, says, "I welcome these new employees. Their collective and varied experience and talents will blend well with our current procedures and philosophy."
